

Website Audit

Client Name: **Jane Roe**

Website Type: **Florist**

Client Wishlist:

- | | |
|---------------------|---|
| 1. Holiday Specials | ... Because holiday-themed arrangements bring a lot of demand. |
| 2. Occasions Tab | ... Because flowers for occasions bring a lot of demand. A tab dedicated to the common occasions a customer may need flowers for will ensure a smoother navigation process. |
| 3. Sympathy | ... Because flowers for funerals bring a lot of demand. These also require specific arrangements so it ensures that the customer will bring an appropriate offering to the ceremony. |
| 4. Shop Flowers | ... Because ready-made orders are one of the most common arrangements customers look for. |
| 5. Enquiries | ... Because some customers may be looking to host an event or would like to order a specific flower arrangement. This ensures that the customers know that the website is not only for ready-made orders but for custom orders as well. |
| 6. Account Creation | ... Because creating an account will cater to loyal returning customers. With this, their addresses, contact information, and previous orders are stored. |
| 7. Delivery Option | ... Because some customers may want to deliver the flowers to a specific address. |
| 8. Pick-up Option | ... Because some customers may want to pick the flowers up from the store themselves. |
| 9. Top Reviews | ... Because this may leave a positive impression on new customers. |
| 10. Embedded Map | ... Because some customers may prefer to go to the physical store for their respective reasons. |

Use Cases:

1. Navigation Bar

- The top-level menu will contain links to the following sections:
 - a. Register / Log in
 - b. Seasonal Specials
 - c. Shop Flowers
 - d. Home Page
 - e. Sympathy
 - f. Enquiries
 - g. Search Bar

h. Shopping Cart

2. **Register / Log in**

- Account creation is not a requirement to purchase flowers from the store.
- Customers will be allowed to register for or log into their account. They will be allowed to save their contact information, delivery address/es, payment method/s, and have access to their previous order/s.

3. **Home Page**

- In the Navigation Bar, this will be presented as the store's logo in the centre.
- This page will promote the seasonal and most popular products, as well as showcase the top reviews and embedded map of the store.

4. **Seasonal Specials**

- This page will be updated regularly to represent the most current holiday of the month. It will include holiday-themed flower arrangements which will range from bouquets to vases.
- On months with no distinct holidays, this page will display flower arrangements that are themed around the current season.

5. **Shop Flowers**

- This page will include some of the most common occasions a customer may purchase flowers for. They will be separated into the following sections that contain more specific options:
 - a. Weddings and Events
 - b. Life's Events
 - c. Plants, Gift Baskets, and Add-ons
- Customers also have the option to view all products at once.

6. **Sympathy**

- This page will focus on flower arrangements for funeral ceremonies.

7. **Enquiries**

- This page will present the customer with the store's contact information and a portfolio of common events and ceremonies the store has done.

1. **Search Bar**

- Customers will be able to look up specific types of products they want.

8. **Shopping Cart**

- In the Navigation Bar, this will be presented as a shopping cart icon on the upper right corner. It will have a numbered badge that reflects how many products the customer has on their cart.
- This page will list the products the customer is interested in buying. Here, they can add and remove products before proceeding with placing an order.

9. **Place an Order**

- Customers will be presented with the products they are about to purchase to confirm.
- Ability to choose between delivery and pick-up.

- Ability to schedule orders ahead of time.
- Ability to customize order (e.g.: including add-ons).
- Add special instructions (e.g.: a written note).

10. Recipient Confirmation

- Customers will confirm if the recipient's delivery address and information are accurate.
- The order will not be processed if the address is outside of the store's delivery zone.

11. Payment Processing

- Customers will complete the transaction by providing secure payment options (e.g.: credit card, debit card, mobile payment, etc.).
- Cash on Delivery is not permitted.

12. Track Order Status

- Customers will receive regular updates on the status of their order.

13. Rating and Reviewing

- Once the order is completed, customers will be prompted to leave a review on the website.

14. Order History

- Only available for Customers with logged in accounts
- This page will include receipts and delivery tracking number.
- Customers will be able to repurchase non-seasonal arrangements.

15. Customer Support

- Customers will have the option to receive a full refund or new flower arrangement if they present valid proof that the store did not handle their order well (e.g.: delivered to the wrong address; present tracking number).

16. Subscription Service

- Customers will receive Designer's Choice flower arrangements monthly.

|--------------------------|---|
| 1. The Tree House Flower | [https://www.thetreehouseflowers.com/] |
| 2. Beddington Florist | [https://www.beddingtonflorist.com/] |
| 3. Grower Direct Acadia | [https://www.calgarygrowerdirect.com/] |
| 4. FlowerChix | [https://www.flowerchix.com/] |

Common Features

1. Special section for Holidays, Funerals, and Events respectively.
2. Opening a product link often lets you customize your order immediately.
3. Flowers in-line with the current holiday season are promoted on the home page.
4. It's common to have a search bar in the Navigation Bar.
5. The store's contact information is always displayed somewhere on the page.

Common Challenges faced by Florist Websites

1. The arrangement may be misrepresented by a picture.
2. The layout often isn't suited for mobile devices.
3. Layout becomes convoluted due to the range of options with flowers.
4. It's challenging to differentiate one store from another.
5. The UI Design is outdated.

How would a customer interact with The Tree House Flower?

1. The Tree House Flower does not require an account, so the customer can proceed straight to picking out an arrangement the store offers.
2. Once the customer has clicked on an arrangement, they are immediately given the option to customize their order. This includes:
 - Sizing options
 - Add-ons
 - Delivery or Pick-up
 - a. Zip Code
 - b. Schedule
 - Card Message
3. Then, they can add it to their cart or proceed to checkout with Apple Pay.
4. Once it is added to their cart, they can fill out their Delivery Information, which includes:
 - Adding a tip
 - Entering Recipient Information (bypassed by checking off the pick-up option)
 - Entering Delivery Information
 - Card Message to Recipient
5. After confirming the Delivery information, the customer can now input their payment methods. They are also given the option to apply a special offer and create an account.
6. The customer can now place their order.

Overlaps / Gaps

Overlaps

List of Features to Prioritize

High Priority

1. **Addressing potential issues with the UI design**

- Because of the range of events Florists cater to, listing them all down can make the website difficult to navigate and even prevent someone to see certain aspects of the website. With this, it is vital to make the design simpler and sleeker and to ensure that customers will be able to use the website efficiently.
- Additionally, optimizing the website for mobile devices will be prioritized.

2. **Differentiating the brand from other stores**

- To help the store stand out from other shops, the brand's identity will remain consistent and uniform throughout the design. Additionally, this aspect will be heavily dictated by the quality of its UX and UI design, so it is vital that the design excels in catering to the users.

Medium Priority

1. **Ensuring that the display photos represent the arrangement accurately**

- The issue often lies with an arrangement being displayed with only a singular, heavily edited photo. To tackle this, the store's website will display multiple angles of the arrangement with its only edits being minimal and necessary.

2. **Addressing outdated-looking web design**

- To avoid this, the website will be sticking to a specific colour scheme, use a maximum of three fonts, and paying attention to how elements are placed.

Low Priority

1. **Address Confirmation**

- This will display the address the customer typed in, allowing them to recheck the address before placing the order.

2. **Preemptive Delay Warning**

- While delays are usually caused by uncontrollable and unexpected situations, there are times where it can be foreseen (e.g.: bad weather) and in those situations, the website will let the customer know that there could be potential delays.
